

IUPAC2025

Kuala Lumpur Convention Centre, Malaysia

53rd IUPAC General Assembly (53GA)

12th - 16th July 2025

50th World Chemistry Congress (50WCC)

14th - 19th July 2025

THE AMERICAN CHEMICAL SOCIETY INVITES YOU TO JOIN

Demystifying Scientific Collaboration

ChM. Dr. Hooi Ling Lee

Mentor - Mentee Relationships

ChM. Dr. Mohd Bakri Bakar

Reach Your Career Goals with ChemIDP

Chemistry for Sustainable Future

Demystifying Scientific Collaboration and A Guide to Strong Mentor-Mentee Relationships

Join the American Chemical Society to demystify scientific collaborations and make the most of a mentorship. After attending these two sessions, participants will have a deeper understanding of how to strengthen existing mentor-mentee relationships as well as how to develop new ones. Attendees will also leave with actionable tips on managing different types of partnerships, including research collaborations and outreach events. This presentation includes recommendations on identifying and reaching out to potential teammates, developing collaboration agreements and managing large complex partnerships.

Using Individual Development Plans to Plan for Your Career

Individual Development Plans (IDPs) support the career and professional growth of individuals in setting milestones through an iterative process of self-assessment, skill-strengthening, career exploration, and goal setting. This workshop guides participants in using the IDP framework to develop a tentative career plan tailored to their unique experiences, interests, and strengths.
